There are two scholarships that the Corpus Christi Chapter of the American Institute of Architects sponsors. The first is an annual scholarship awarded to a student in the Del Mar College Architectural Technologies program who wishes to continue into a professional architectural degree program in the State of Texas. The second is an endowed scholarship managed through the Texas Architectural Foundation, awarded to a second-year student in a Texas school of architecture, who graduated from a high school in our chapter's service area. The intent of both scholarships is to provide a means for students from our geographic area to continue their education in architecture with the hope that they will return to this area to live, work and to improve our built environment.
